

# DA08-DSP

**SOUND** PROCELLA®  
**PERFECTED**

## INTRODUCTION

This massive output power amplifier has the horsepower to bring out every ounce of performance designed into each of Procella's

high-output speaker and subwoofer models. Procella's DA08-DSP can be used as a four-channel amplifier to produce 4x800W (8 ohms) and 4x1.600W (4 ohms), but switch to bridge mode, and it will deliver 2x3.200W (8 ohms) and 2x5.800W (4 ohms)!

In a single rack unit, this power station ensures maximum output and dynamic range, especially for Procella subwoofers.

Factory presets enable multiple configurations with Procella's high output speakers and subwoofers.
